Bundled expertise for TSI and NNTR

Approval of rolling stock and infrastructure in the railway sector is influenced by many different factors and requires a high level of expertise and experience. DB Systemtechnik GmbH has been at your disposal in many of these areas for many years.

This portfolio under the umbrella of Deutsche Bahn AG is now supplemented by Railway Approvals Germany GmbH (RAG), which bundles activities in the field of European and national conformity assessment (TSI and NNTR).

A high-speed train platform at night, illuminated by blue and white lights. The platform is on the left, with tracks and overhead power lines extending into the distance. A signal light is visible in the foreground, and another one further down the tracks. The scene is captured from a low angle, looking down the tracks.

Your new player:
professional and impartial

Founded as an independent body and operating in accordance with the requirements of EN ISO/IEC 17065, RAG is in a position to provide you with our know-how and experience on the way to certification and to offer you our services in an accurate manner. It is self-evident that all certification procedures are independent and non-partisan.

The recognition of RAG as Notified Body and Designated Body is scheduled for 2019.

Reliable commissioning

Due to precise knowledge of the requirements from specifications, technical specifications as well as national and international regulations, we enable our customers to start up on time and within the budget.

The conformity assessment of your vehicles, components or infrastructure in the national and European market is our job.

Your path for the approval
of all subsystems

The logo for Railway Approvals Germany features the words "railway" and "approvals" in a white, lowercase, sans-serif font. "railway" is positioned on a dark blue rectangular background, while "approvals" is on a lighter blue rectangular background.
